Electric, Gas and Performance Based Ratemaking

This session will give students insight into the differences of electric and gas rate cases.

Nick Wagner, Commissioner Emeritus Iowa, NARUC Past President
Currently Vice President, Colorado Regulatory Affairs & Policy, Black Hills Corp.

Don't Lose the Forest for the Trees

This week Rate School Students learned about the ratemaking process and have calculated some detailed adjustments. *Now what?* This **interactive** session will explain the significance of the bigger picture, such as consideration of utility policy issues and commission precedents as well as answer any questions you may have.

Whether you are advocating for a party or advising a commission, you need to understand how ratemaking works to better understand the issues at hand. Parties to a utility rate proceeding come with different perspectives and objectives, but in the end all parties are interested in knowing what can and will be included in rates, at what level, and why. Come prepared to ask your questions for the Rate School Team to answer.

Analysis and Discussion of Team Solutions PLUS Team Awards!

Steve Olea, Arizona Corporation Commission
